PROFESSIONAL SUMMARY

AI Developer with 1+ year of experience designing and deploying intelligent automation and NLP-driven systems using Python, FastAPI, and modern AI frameworks. Hands-on experience building real-world solutions involving embeddings, resume intelligence, and API-driven automation. Strong foundation in Large Language Models (LLMs), including GPT-based architectures, with the ability to integrate AI into scalable backend systems. Passionate about solving complex business problems, particularly in fintech and data-driven domains.

CERTIFICATIONS

- IEEE Certificate for 'Safe and Secure Communication Using SSL/TLS'.
- Participated in Tech Triumph 1.0 Hackathon (CodeChef ASEB).

TECHNICAL SKILLS

- Large Language Models: GPT-3.5/4 (OpenAI APIs), OLLAMA, LLM Integration, Prompt Engineering
- Programming: Python, Java, C/C++, HTML, CSS
- AI/ML: NLP, Machine Learning, Deep Learning, Embeddings
- Cloud & Databases: AWS (EC2, S3, IAM), PostgreSQL, MySQL
- Tools: Git, Postman, Power BI, Tableau, VS Code

WORK EXPERIENCE

Associate Python Developer — Infologitech

Nov 2024 – Present | Hyderabad, India

- Developed LinkedIn workflow automation with OAuth authentication, automated posting, and image uploading.
- Built a Resume Scoring System using FastAPI, NLP, embeddings and structured scoring logic.
- Implemented GitHub automation for repo creation, project upload, and secure token-based operations.
- Performed Postman API testing for validating request flows and automation reliability.
- Improved backend architecture by implementing better error handling, validation, and modular structure.
- Worked on multi-vendor automation workflows with secure token management.

Business Analyst Intern — Outlook Publishing India Pvt. Ltd.

Apr 2024 – Jul 2024 | Remote

- Conducted detailed market research and competitive analysis to support business strategy and content planning.
- Created dashboards and visual analytical reports using Power BI, Tableau, and Excel to support decision-making.

- Worked on data cleaning, formatting, and insights extraction for editorial and marketing teams.
- Documented workflows, produced requirement specifications, and participated in stakeholder discussions to refine business needs.

PROJECTS

Underwater Image Detection — YOLOv8, Deep Learning

- Technologies Used: YOLOv8, PyTorch, TensorFlow, NumPy, Pandas, Matplotlib
- Built a marine-life detection system using YOLOv8 for underwater species identification.
- Performed dataset annotation, cleaning, and preprocessing for high-quality model training.
- Trained and fine-tuned model with augmentation techniques for low-visibility underwater environments.
- Evaluated detection accuracy using mAP, IoU, precision, and recall metrics.

Cloud-Based Cab Hiring System — AWS Deployment

- Technologies Used: HTML, CSS, PHP, AWS EC2, S3, IAM
- Developed a complete cab-booking platform with login, booking flow, and ride status features.
- Built backend logic in PHP for fare calculation, booking flow, and validation workflows.
- Deployed using AWS EC2 with S3 storage and IAM for secure role management.

Glaucoma Detection — Deep Learning

- Technologies Used: CNN, VGG16, LSTM, Bi-LSTM, TensorFlow, PyTorch, NumPy
- Prepared glaucoma fundus image datasets with preprocessing and normalization.
- Developed deep learning models such as CNN, VGG16, LSTM, and Bi-LSTM for disease classification.
- Trained and tuned models to improve accuracy, sensitivity, and specificity.
- Evaluated performance using F1-score.

EDUCATION

B.Tech – Computer Science & Engineering

Amrita Vishwa Vidyapeetham | 2020–2024

ACHIEVEMENTS

- Recognized for performance in 2025 during automation development at Infologitech.
